SCREED GLASS FIBER ECO

Item number: **1480-006 / 1480-012**
Material basis: E glass fiber
Color: White
Fiber length: 6/12 mm
Tex-number: 2400
Production type: Continuous filament
Storage: Dry conditions

Delivery:	Packaging unit:	kg/bag:	kg/Palette:
	Bulk	20	900
	Bag with 1kg	20	900

Main field of application

Bonded screed and floating screed

Suitable for concrete, in order to prevent shrinkage cracks, but not as a replacement for the reinforcement.

Advantages

- Uniform distribution and no formation of lumps
- It comes not to the surface
- Minimisation of premature shrinkage cracks in the cement
- Takes over the tensions during the setting process
- Lower price than PP and AR - glass fibres thanks to higher availability on the market
- They do not corrode

Processing

The addition of fibres can be done in a concrete factory, as well as on the construction site.

The screed fiber ECO requires no additional mixing time, can be easily mixed in the screed and prevents the formation of lumps.

The screed fibre ECO has no effect on the processing of the screed and the water/cement ratio.

The practical and precise dosing in the screed machine is possible thanks to the advantageous sachets.

Recommended quantity: 0.75 - 3 kg per m³ screed.* We highly recommend that you carry out specific tests to determine the optimum quantity for your mixes.

* Above information can be only general instructions. The working conditions outside our sphere of influence and the variety of different materials exclude a claim from this information. In case of doubt, we recommend carry out sufficient tests. A warranty can be applied only to the constant quality of our products.

The information, and, in particular, the recommendations relating to the application and end-use of SMET distributed products, are given in good faith based on SMET's current knowledge and experience of the products when properly stored, handled and applied under normal conditions in accordance with the manufacturer's recommendations. In practice, the differences in materials, substrates and actual site conditions are such that no warranty in respect of merchantability or of fitness for a particular purpose, nor any liability arising out of any legal relationship whatsoever, can be inferred either from this information, or from any written recommendations, or from any other advice offered. The user of the product must test the product's suitability for the intended application and purpose. The manufacturer reserves the right to change the properties of its products. The proprietary rights of third parties must be observed. All orders are accepted subject to our current terms of sale and delivery. Users must always refer to the most recent issue of the local Product Data Sheet for the product concerned, copies of which will be supplied on request.
